# Construction Update

**Baxter Street to  
Brooklyn Village Avenue**  
*(formerly Stonewall Street)*

**Wastewater**  
Pipe Replacement Project  
JANUARY 2023 PROJECT UPDATE

# Baxter Street to Brooklyn Village Avenue Wastewater Replacement Project

Contractors for Charlotte Water continue constructing an important wastewater project in the Uptown area that will expand the future capacity of the wastewater system in the growing central business district.

Since the work began on Phase 2 of the project in September 2021, crews have tunneled under the streets and installed tunnel shafts in the road along Baxter Street, S. McDowell Street and Brooklyn Village Avenue. To date, approximately 5,500 linear feet of pipe has been installed in a tunnel 55-feet underground.

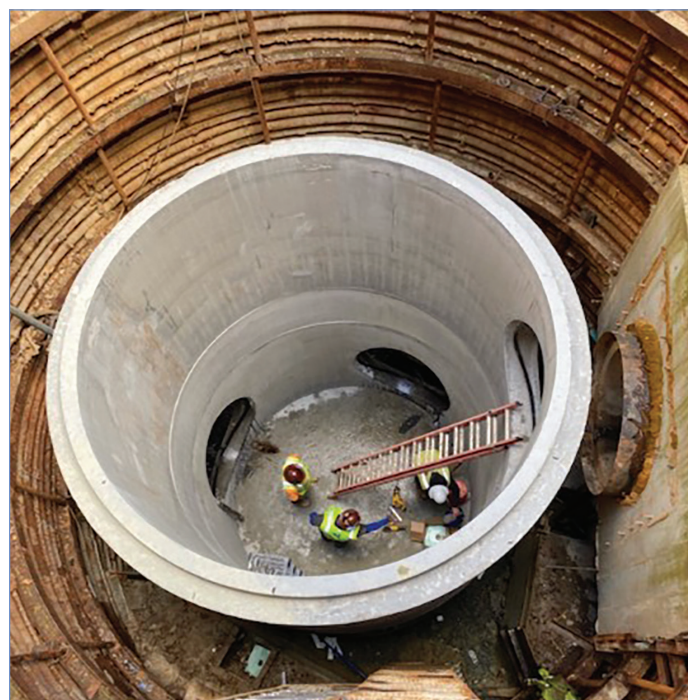

Phase 2 is ongoing and expected to be completed in fall of 2023. Please note there will be varying levels of activity along the project alignment, and schedules are subject to change due to weather and other conditions.

## Current and Upcoming Work

- Crews are continuing to work at the intersection of Brooklyn Village Avenue and S. Alexander Street. Rolling lane closures are still in place as work progresses.

- The City of Charlotte has approved a project extension to complete future work that is needed in the area. Crews will begin work on the extension in February and construction is expected to be completed by August 2023. This work will bring wastewater capacity expansion and improvements for the growing central business district.

## Construction Activities to Expect

### Lane closures and detours around work –

The intersection of Brooklyn Village Avenue and S. Alexander Street will have rolling lane closures in place until fall of 2023. Local business access will continue to be maintained throughout construction.

**Construction equipment and materials** – Crews store equipment, pipe and other materials along the project site throughout construction.

**Tunnel construction** – Crews work at entry and exit shafts and tunnel in between to reduce impact to properties and motorists.

**Construction traffic** – Dump trucks travel along the alignment, within the easements and roadways.

**QUESTIONS:** Please visit the project webpage at [www.charlottewater.org](http://www.charlottewater.org) (click on “projects”) for updates on progress. If you have questions, please contact project manager Bill Deal, (980) 722-0786.
